

## Job Posting – McInnis Ciment

### Process Engineer

At the cutting edge of technology, this cement plant supplies their customers with superior-quality cement throughout North America. Here you will take part in decisions, use innovative processes, and contribute to sustainable development. Discover the joys of working with an employer who actually cares about you.

Under the supervisor of the Process, Quality and Environmental Director, you will be responsible for optimizing the performance of the cement plant while meeting quality, quantity and cost objectives.

#### RESPONSABILITIES

- ✚ Evaluate and establish the operational capability of the equipment;
- ✚ Define Performance Objectives Process, identify pathways for progress and execute continuous improvement projects;
- ✚ Carry out activities while being mindful of environmental issues;
- ✚ Identify processes and equipment bottlenecks;
- ✚ Resolve instability issues and recurring problems;
- ✚ Adjust control loops and operator interfaces;
- ✚ Identify different ways to improve and put in place continuous improvement projects;
- ✚ Perform statistical analysis and monitor the process to detect and prevent deviances of any equipment;
- ✚ Plan and monitor trials;
- ✚ Create operational procedures and train other employees during their implementation;
- ✚ Meet health, safety and environmental objectives of the department;
- ✚ Implement best practices and achieve performance objectives (KPIs);
- ✚ Ensure that work areas are organized and clean (5S);
- ✚ Ensure the application and respect of good practices in the field of health and safety at work, as well as the application of environmental standards.

#### YOUR PROFIL

- ✚ Bachelor's degree in Chemical Engineering (major asset);
- ✚ or in mechanical engineering, metallurgical engineering or a related field
- ✚ or DEC in Chemical Engineering if combined with significant experience in cement works;
- ✚ Three (3) years of working experience in a position directly related to industrial processes;
- ✚ Knowledge of cement and cement plant processes;
- ✚ Strong calculation skills;
- ✚ Fluent in French and English, both orally and in writing;
- ✚ Sense of analysis, rigour, problem solving and priority management;
- ✚ Autonomy and initiative;
- ✚ Relational and communication skills.

#### BENEFITS

- ✚ A growing Quebec organization, a dynamic work environment and exciting challenges;
- ✚ A company that encourages initiative, self-reliance, and proactivity, allowing you to have real influence on decisions and project progress;
- ✚ Innovative practices related to new technology;
- ✚ A competitive salary and employee benefit plan.
