

## Job Description - McInnis Quarries

### MINING SURVEY MANAGER

**Location :** Port-Daniel-Gascons, Gaspésie

**Reporting to:** Mining Engineer

**Status:** Permanent - Full time

McInnis Quarries is a supplier of limestone for McInnis Cement, a state-of-the-art cement plant that has a strong North American touch. The Port-Daniel-Gascons plant in Gaspésie is one of the largest industrial developments in Quebec. The quarry's mission is to provide high quality limestone for McInnis Cement to provide its customers with high quality cements manufactured and distributed according to the principles of sustainable development. In addition, contributing to local economic activity is one of the priorities of this new company.

#### RESPONSIBILITIES

Under the supervision of the Mining Engineer, the Mining Survey Manager carries out daily monitoring of the mining plans as well as the implementation and regular monitoring of drilling and blasting. He supports the blasting-mining Supervisor with the help of survey tools and topographic surveys. Through his job, he / she contributes to the provision of the factory products meeting the quality requirements.

#### SPECIFIC MISSIONS

- ⚡ Keeping the workplace orderly and clean (5S)
- ⚡ Ensure proper health and safety practices at work
- ⚡ Ensure environmental sustainability
- ⚡ Responsible for helping with planning through certain tasks such as:
  - ⚡ Production of drilling plans and blasting using software
  - ⚡ Execution of implanting as well as the daily survey of the drill holes with the GPS
  - ⚡ Export / import holes from software and keep hole database updated
  - ⚡ Realization of shooting faces profiles using technological tools
- ⚡ Install various technological tools during blasting (seismographs, camera, microphone, etc.)
- ⚡ Compile drilling and blasting reports for monitoring used quantities, drilled linear meters and seismograph measurements, as well as gear and limestone loading reports for software tracking
- ⚡ Supervise field work related to drilling / blasting by in-house teams or subcontractors
- ⚡ Place orders for specific explosives needs according to the volumes indicated by the Mining Engineer and / or the Drilling-Mining Supervisor
- ⚡ Make inventory of stockpiles
- ⚡ Ensure the proper drainage of water in the sumps inside the quarry as well as of the polishing basin
- ⚡ Take measurements for various studies of time and effectiveness of the gears
