

Job Description - McInnis Quarries

MOBILE EQUIPMENT OPERATOR

Location: Port-Daniel-Gascons, Gaspésie

Reporting to: Drilling & blasting Supervisor

Status: Permanent - Full time

McInnis Quarries is a supplier of limestone for McInnis Cement, a state-of-the-art cement plant that has a strong North American touch. The Port-Daniel-Gascons plant in Gaspésie is one of the largest industrial developments in Quebec. The quarry's mission is to provide high quality limestone for McInnis Cement to provide its customers with high quality cements manufactured and distributed according to the principles of sustainable development. In addition, contributing to local economic activity is one of the priorities of this new company.

RESPONSIBILITIES

Under the responsibility of the drilling & blasting Supervisor, the mobile equipment operator is responsible of quarry work with mobile equipment (loading of dumpers, feeding of the primary crusher, stockpiling, earthworks, etc.) ensuring compliance with the instructions according to the area of evolution while incorporating the concepts of Safety/Quality/Environment, in the interests of efficiency and good material management. He provides the factory with the products that meet the customer requirements, ensuring a good production rate, or by ensuring a good preparation of the ground.

SPECIFIC MISSIONS

Vehicle:

- Perform the regular checks required on the machine (lights, levels, purges) to keep it in good condition (including internal and external washing).
- Detect, report any anomaly on the machine and establish an intervention order for maintenance, to allow a good availability of the machine.

Driving:

- Adapt the driving of the machine according to the instructions, operation, land and traffic rules on the zones (plant, stockpiles, top or bottom of quarry), in order to act in the optimal conditions of production / safety / and taking care to not damage the tyres.
- Adapt to work area (flat surface)
- Carry out various tasks with the loader taking into account of the locations: production, to clean floors, move blocks, ... with respect to the given instructions.
- Related to entrusted responsibilities:

Transport:

- Feed the primary installation and the storage platform, taking care of the feed rate and the unloading instructions of the buckets (respect of the signs, ...)

Job Description - McInnis Quarries

MOBILE EQUIPMENT OPERATOR

Earthworks:

- Transport materials to lay out trails, to move rubble or waste, or for various jobs, making sure to unload the right product in the right place.
- Ensure the proper snow removal and sandblasting of the runway, using the appropriate materials.

Loading:

- Sort the materials, in front of the stones for rockfill, or to remove any element that may affect the quality of the desired product or the performance of the facilities (block size, excessive moisture).
- Load the dumpers / or hoppers, ensuring the correct bucket filling, by timing feed rates and respecting the instructions according to the evolution zones (as per loading plan, primary crusher, stock).
